FOR IMMEDIATE RELEASE

SWR INSTITUTE ANNOUNCES THE WINNERS OF ITS 2021 PROJECT AWARDS

Kansas City, MO., March 22, 2022—We are entering our third year of the Award of Excellence program. The Award of Excellence is a contractor only award program that provides an excellent opportunity to gain national recognition for your unique project accomplishments.

This year we had the honor of awarding THREE Award of Excellence plaques. Please give a big round of applause for this year’s winners for their very notable and impressive projects in the industry. Each winning project has its unique challenges and accomplishments, and we want to shine a light on 2021’s project award winners.

Award of Excellence Winner #1

Project Name: West Virginia State Capital Dome Moisture Intrusion Repair Project

Company: Pullman SST, Inc.

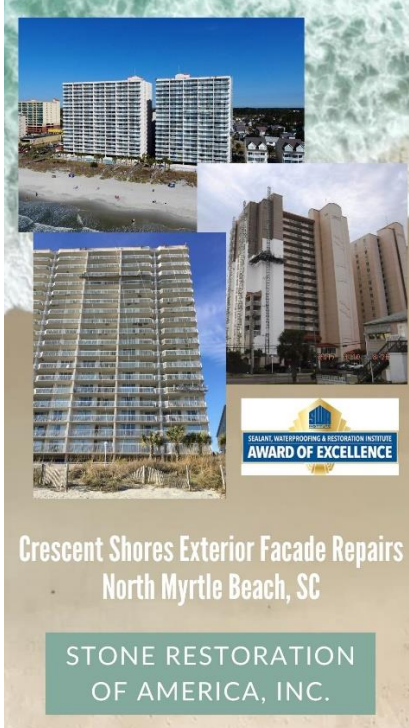

Location: Charleston, WV

Duration: 1,010 Days

Abstract: The West Virginia State Capitol Building is one of the most iconic structures in the State. The people of West Virginia cherish their heritage, and the buildings that represent their history. A restoration project with the size, complexity, and scope, performed in view of the public was not only a great opportunity to provide our professional services, but was also a true honor to perform. All the many

repairs and restoration scopes performed on this project were undertaken with great care, pride and passion. In our industry, projects like this one are a clear example of how the collaborative teamwork of craftsman, knowledge of our members and dedication to quality and safety all come together to achieve success.

Award of Excellence Winner #2

Project Name: Crescent Shores Exterior Facade Repairs

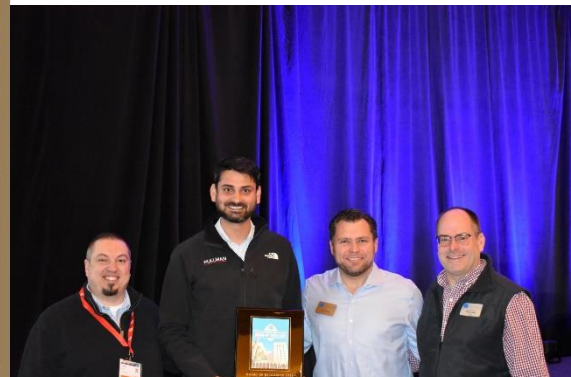

Company: Stone Restoration of America, Inc.

Location: North Myrtle Beach, SC

Duration: 340 Days

Abstract: This was a completely unique and revolutionary solution to a gigantic problem. Being able to leave the failed stucco in place saved the owner a lot of time and money compared to having to remove all of the original stucco first. It is estimated that removal would have increased the project price by 30-40%.

Award of Excellence Winner #3

Project Name: Senator Hotel Office Building

Company: Pullman SST, Inc.

Location: Sacramento, CA

Duration: 400 Days

Abstract: The prestigious Senator Building is located directly across from the Capitol Building in Sacramento, CA and is listed in the National Register of Historic Places and the Sacramento Register of Historical and Cultural Resources. After being purchased in 2018, the new owner wanted to have a superlative restoration of the exterior façade. Due to the age of the building and poor-quality repairs done previously, the scope was extensive and necessary. The restoration included restoring the concrete substrate, exterior cement plaster finish, ornamental precast elements, historic wood window assemblies, and the historic redwood flagpoles, as well as recoating of all exterior façade elements.
