
CONTINUING EDUCATION PROGRAM

Polyguard Products, Inc. is proud to be a certified AIA and IIBEC Continuing Education Provider. We have several courses available to keep your firm up to date on the most current information regarding products and best practices in the commercial construction industry. We invite you to join us for the following course as detailed below.

DATE & TIME:

LOCATION:

- ❖ *Course certificates will be provided for all attendees.*
- ❖ *AIA credits will be submitted by Polyguard Products, Inc.*
- ❖ *IIBEC credits are self-reporting.*

COURSE TITLE: The Integrated Building Envelope™:
Chemical Resistant Membrane
In An Integrated Building Envelope - DMI

COURSE NUMBER: PGIBECRMDMI202

PROVIDER NUMBER: AIA - K477 • IIBEC - *none*

AIA CREDIT: This course qualifies for 1.0 HSW/LU credit

IIBEC CREDIT: This course qualifies for 1.0 CEH credit

Polyguard is proud to be a member of these industry organizations:

COURSE DESCRIPTION:

Urban revitalization is a growing trend across the country, and with it comes some unique challenges. One of the major challenges is the need to waterproof the new structure in soils that have been contaminated with chemicals from the previous activities performed on the land. Sites that had been gas stations, dry cleaners, or print shops are prime examples. It is vitally important that the waterproofing system not only be made watertight from the start, but that it will remain watertight over the life of the structure by resisting the chemicals present in the soils.

LEARNING OBJECTIVES:

- Define and develop a better understanding of the Building Envelope concept.
- Develop a better understanding of available vapor barriers and waterproofing systems for Brownfield sites.
- Develop an understanding of Brownfield sites and how the chemical contaminants react in the watertable.
- Explore the process of proactively creating coordination between Design, Material and Installation to achieve an Integrated Building Envelope.

As a single source manufacturer, Polyguard offers the latest innovations in building envelope components to control moisture and air within buildings. Our Integrated Building Envelope System™ includes products designed to work together with unique connection points to protect the structure from below grade to the roof.

For questions, samples, literature and any further information, please feel free to consult with our Polyguard Professional instructor upon conclusion of the course. You may also visit our website, <https://polyguardproducts.com/architectural/> for access to all of our product information and resources.
