

OBJECTIVES - SIKALASTIC DECKPRO TRAFFIC SYSTEMS

- At the end of this training program, participants will be able to:
 1. Become more familiar with “DECK COATING” related products and services provided by Sika Corporation.
 2. Define types of deck coatings / traffic systems and their properties using industry standard guidelines to help choose the correct types of deck / traffic coating system components, their proper design, specifications and details for working plans and drawings.
 3. Analyze the differences in chemistries that are standard in the industry, and their performance expectations for the intended application.
 4. Examine an existing structure or system’s problems by analyzing deck / traffic coating system performance or installation issues using industry and manufacturer’s guidelines to prevent similar issues during renovation.
 5. Apply the proper quality control and testing procedures for deck / traffic coating system installation and removal (if necessary) using manufacturers' data sheets and industry best practice methods.
