COME JOIN US!  Affiliate yourself with those who are most passionate about the sealant, waterproofing and restoration industry. Collectively, our members have developed many resources that elevate the standards of practice for the industry. Please take the time to explore the MANY resources and member benefits SWR Institute has to offer!

MEMBERSHIP CATEGORIES

We strongly encourage you to get involved with SWR Institute. This is a nuts and bolts kind of group that provides contractors and associate members with technical information, contacts and best business practices that can be found nowhere else. Our manufacturer members benefit from having intimate access to our contractor members because only our manufacturer members are given the opportunity to advertise in our publications and exhibit and sponsor at our meetings.

We are not a large organization and we feel this is one of our main benefits. In fact, it has always been our goal not to be a large group. We focus on companies that are interested in providing quality, service and integrity to their customers and those who raise the bar in the industry.

ASSOCIATE MEMBERSHIP may be conferred upon any architect (RA), engineer (PE) or other licensed design professional whose services are primarily in the sealant, waterproofing and restoration industry, or consultant who is affiliated with an industry association program

Associate Annual Dues
- $1 to $999,999 .......... $650.00
- $1,000,000 to $9,999,999 ...... $850.00
- $10,000,000+ ................ $1,050.00

CONTRACTOR MEMBERSHIP is open to persons, corporations, partnerships or associations, which install sealant, waterproofing or restoration materials. Membership is by company and is a voting category. Contractor members can serve on committees and are eligible to be elected to serve on the board of directors and hold office.

Contractor Annual Dues
- $1 - $999,999 .................... $650
- $1,000,000 - $2,499,999 ......... $850
- $2,500,000 - $4,999,999 .......... $1,050
- $5,000,000 - $10,000,000 ...... $1,350
- $10,000,000+ ..................... $1,750

MANUFACTURING MEMBERSHIP shall include any proprietorship or corporation engaged in manufacturing of sealant, waterproofing or restoration products that are sold to contractor members. Manufacturer members shall not be eligible to be officers in the organization; however, Manufacturer members can serve on committees and two (2) manufacturer members may be elected to the board of directors.

Manufacturer Annual Dues
- $1 - $2,999,999 ................. $1,400
- $3,000,000 - $50,000,000 .... $1,800
- $50,000,000+ ..................... $3,550

ONLINE RESOURCES

Searchable Directory and Verified Contractor Program

We have developed a new membership directory that benefits all of our members. Contractors have the opportunity to have an enhanced listing that includes third-party data verification. Manufacturers will be searchable by products sold. Design professionals will be searchable by state(s) serviced. All contractors will be searchable by the states in which they are licensed or authorized to conduct business, but only contractors that go through the third-party verification entity will be searchable by the other search fields in the directory. It’s VERY important to update your company’s information so it displays accurately in the searchable directory.

ABOUT SWR INSTITUTE

The Sealant, Waterproofing and Restoration Institute (SWR Institute) is a non-profit corporation that began with 12 members in 1976 as an organization strictly for commercial contractors. However, in 1977 manufacturers and in 1994 design professionals were added as members. Each membership category brings a unique understanding of the sealant, waterproofing and restoration industry. This distinct mix of industry professionals, all working together towards elevating the standards of the members and industry, has been the lynchpin of SWR Institute’s success.

“SWR Institute has some of the brightest and most successful minds in the sealant, waterproofing and restoration industry. You can learn a lot to improve your business if you are a contractor, manufacturer or associate. Meetings are key. This is where you build your relationships for the future. To get the most from SWR Institute, you must be active. Start with some committees and consider presentations. These are both great for exposure and they show that you are here for the long-term. A hint…if you show up for one or two meetings here and there, members know you are not serious. The group will welcome you each time with open arms, but they will connect with you long term if you attend frequently.”

– Brett Laureys
Wiss, Janney, Elstner & Associates Inc.

“It is a great group of contractors that have the same mindset about quality workmanship and commitment to their clients – and you can tell they love the work. The Technical Meetings, website and newsletter are always informative.”

– Tom Miller, Advanced Masonry Restoration
ENJOY THE BENEFITS OF NETWORKING WITH INDUSTRY EXPERTS AT SWR INSTITUTE TECHNICAL MEETINGS

SWR Institute hosts two meetings each year with the Fall Technical Meeting being held in late September/early October and the Winter Technical Meeting being held in late February/early March. They are always held in appealing locations with well-designed, informative programs. Our speakers and presenters read like a who’s who of the industry. One of the most interesting and helpful segments at every SWR Institute meeting is our Technical Clearinghouse. This is an interactive forum where job problems or questions are presented to the entire group for answers and solutions. They are always lively and helpful! Additionally, our meetings discuss general business, regulatory and legal issues that impact all of our members. But our meetings are not all work; we always build in considerable time for interaction with fellow SWR Institute members at formal receptions, golf, tours of the city, guest/spouse programs and other fun events.

Continued on back side ➤

“SWR Institute has allowed me to build sound relationships with contractors and engineers. Relationships made at Technical Conferences have helped navigate the difficult situations that can arise on projects. The greatest benefit to being part of SWR is the opportunity to have quality interactions with key influencers in the industry.”

– Christopher Perego, BASF Corporation
FALL TECHNICAL MEETING

The Fall Technical Meeting consists of two days of educational programing in a conveniently located city. In addition to educational content there are evening receptions for networking and FUN! Typically, our Fall Technical Meetings have approximately 220 attendees.

Both meetings have the same number of meeting hours and level of technical content. In fact, attendees are able to receive continuing educational credit from the American Institute of Architects (AIA). We have a very strong Program Planning Committee that works diligently to provide programs and presentations that are informative, well designed and meet the high standards of our attendees.

Having highly useful and well-designed technical content is only half of the equation. The other half is the fellowship that our attendees enjoy at SWR Institute meetings. SWR Institute supports this fellowship so much that it is addressed in our mission statement! We want our members and attendees to feel a part of our community, which is why we created the Ambassador Program. At your first meeting, you’ll be invited to attend our First Timers’ Orientation and Reception. For an easy transition into the Institute, the Ambassador Program pairs one new member or first-time attendee with an experienced member.

WINTER TECHNICAL MEETING

The Winter Technical Meeting is three half-days and usually takes place in a warm, resort-style environment. Our Winter Technical Meetings are held each year in either February or March. Typically the Winter Technical Meeting has around 200 attendees and includes contractors, senior level manufacturer representatives and design professionals. We feel the size of our meetings provide attendees with more opportunities for interaction with other members. What really sets our meetings apart is our members’ willingness to share information, not only about what went right with a project, but also what went wrong.

On a number of occasions, member companies have publicly complimented our work and shared our success stories with the larger group. It takes a lifetime to create a reputation and a minute to lose it. SWR Institute members have always been supportive of our work. You will meet some of the best people in the industry at our meetings and have a team of experts at your fingertips when you become a member.

– Laurie Wells, Old World Stone Ltd.
GET INVOLVED AND JOIN A COMMITTEE
We promise you won’t regret it!

The Program Planning Committee develops the meeting content for SWR Institute’s two annual technical meetings. The committee seeks presentations that keep the SWR Institute membership apprised of the industry’s latest technologies and practices, as well as provide an environment that promotes fellowship and the exchange of ideas. If you have ideas about the presentations and events offered at our meetings, we welcome your input and perspective.

The Membership Committee focuses on membership recruitment and retention. The Membership Committee is also responsible for interviewing companies that submit membership applications to the Institute and reporting the information obtained during the interviews to the SWR Institute Board of Directors. Interested participants only need to have ideas about how to attract and retain members that are best-in-class in the industry.

The Safety Committee works closely with OSHA to develop safety resources for our members and the industry at large. Interested volunteers should have a passion for safety and a desire to contribute to our ultimate goal of educating and protecting the workers in our industry. This includes collaborating and sharing information in a group setting, helping to promote OSHA Alliance initiatives and programs and developing new safety resources — with the goal of reducing injuries and saving lives.

The Product Validation Committee is responsible for developing and reviewing product categories to be included under the program. The committee also promotes the Product Validation Program and works to ensure that the industry understands the intent and purpose of the program.

The Training Validation Committee is responsible for expanding the number of training programs validated by SWR Institute. The committee welcomes anyone with a desire to elevate the standards of the training programs offered in our industry.

The Technical Resource Committee is responsible for creating and reviewing SWR Institute technical manuals and publications. The committee seeks those with technical expertise in any of the sealant, waterproofing and restoration categories.

If you are interested in joining a committee, please email nicole@cranemartin.com.
Or you can come to a face-to-face committee meeting on Sunday afternoon at our Fall & Winter Technical Meetings.
5 REASONS TO GET INVOLVED...

Becoming a member is just the start

1. Build Relationships by Networking
Joining a committee helps you build stronger relationships with the industry’s most talented professionals. You’re guaranteed to make new friends and valuable business connections!

2. Brand Building
Not just participating but becoming more involved will help you build your business brand. After all, it’s not just about who you know, but also about who knows you.

3. Development
The things that you will learn while participating on a committee will directly translate into professional and personal development.

4. Leadership Opportunities
Through active participation on a committee, you have a better opportunity to someday become a board member.

5. Working for the Greater Good
Volunteering your time to develop resources for the industry is a rewarding experience.

“SWR Institute is a group of active industry professionals from diverse backgrounds who like to do things the correct way and enjoy themselves while performing a balancing act between costs, schedules, owners, architects and engineers, consultants, suppliers and Mother Nature. What a resource!

– Diane Kaese
Kaese Architecture PLLC

“Most of the people I’ve met through SWR Institute have become a tremendous resource, and are always willing to share their knowledge and experience. The friendships created, because of shared experiences, have been life changing.

– Frank Halsey
Mid-Continental Restoration Company, Inc.”
**When was SWR Institute formed?**
The Sealant and Waterproofing Institute, as it was called then, was formed in 1976 by 12 commercial waterproofing and sealant contractors from around the country. Their mission was to form an organization that would be an open forum where issues and best practices could be discussed and promoted. As the organization grew, it expanded its membership by including manufacturers, architects, engineers and consultants.

**What are the membership categories?**
Contractors are the primary membership category and make up 60% of the total membership. Manufacturers (companies that manufacture sealant, waterproofing and/or restoration materials or products) and Associates (architects, engineers, specifiers and consultants) make up the other 40% of our membership.

**Can distributors be members?**
No.

**Can individuals join?**
No, the membership is a company membership.

**How many members are there?**
Currently there are approximately 283 member companies. We are a small organization but our members employ over 1,300 individuals.

**What are the dues?**
Membership dues are on a sliding scale based on the gross annual sales of each company. This allows both large and small companies to afford membership.

Your membership dues invoice will be mailed out mid-May every year and will need to be paid in full by June 30. You’ll receive a mailed invoice, along with email reminders. You can also find your dues invoice under “Account Details” located on the left side of the toolbar when logged in to your member account.

**What do I get for my dues?**
There is tremendous value in being a member of SWR Institute. The foremost benefit of membership is having a very close-knit group of professionals who are dedicated to making our industry the best it can be. This is not just an idle boast. SWR Institute members are well known for being a trusted resource that answers questions and provides valuable insights into the intricacies of all different kinds of sealant, waterproofing and restoration projects. Members also receive discounts on publications and meetings.

**How big is the board?**
The board is comprised of 15 individuals. An Executive Committee (President, President-Elect, Secretary/Treasurer and Immediate Past President, all of whom are contractors) and 11 Directors (seven Contractor, two Manufacturer and two Associate members).

**Are there committees?**
Currently SWR Institute has nine committees. They include: Membership, Product Validation, Training Validation, Program Planning, Safety, Technical Resource, Brand Awareness, Finance and Nominating.

**What types of publications does SWR Institute publish?**
SWR Institute publishes a wide variety of technical publications that pertain to our industry. The complete list of our publications can be found on the website. In addition, we publish the Applicator Magazine, a print journal that concentrates on projects, best practices and the issues that impact our industry. Applicator Magazine is also available in a digital version. Members also receive a bi-monthly newsletter called Member Briefs that provides current Institute news.

---

**SWR Institute is a great group of individuals and companies with similar goals and experiences, and it’s very easy to connect with people you otherwise would not have had the chance to meet. It’s given me a great network of expertise and lifelong friends**.

— Craig Allender, Simpson Gumpertz & Heger, Inc.

For more information visit us online at [www.swrionline.org](http://www.swrionline.org) or call 816.472.7947
The objective of the Verified Contractor program is to enable end users to systematically and consistently identify and select appropriate and qualified contractors for sealant, waterproofing and restoration projects. To become a Verified Contractor, you’ll need to complete an application that includes general information about your company, financial capacity/stability, project management/resources, personnel resources, track record/customer service, safety record, quality control, and training.

Once you’ve completed the application, the information is submitted and reviewed by an independent third-party entity (Independent Verification Entity or IVE). Once approved, the Verified Contractor status will be good for three years.
GAIN INDUSTRY RECOGNITION
Position yourself and your company as an industry thought leader by giving a presentation at one of our meetings and/or writing an article for our industry publication, Applicator. Many members highlight one of their most challenging, successful or unique projects in a presentation or article.

Another great avenue for you to increase brand awareness for your company is to sponsor and exhibit at our two annual technical meetings and/or advertise in Applicator.

PRODUCT VALIDATION PROGRAM
The Product Validation Program is designed to validate certain performance data that is found on manufacturer’s datasheets. The product validation program is voluntary and laboratory tests are conducted by approved independent laboratories. This offers assurance to end users that the products included under our Product Validation Program match or exceed the performance data reported on their datasheet. The SWR Institute’s Product Validation Program is another tool that end-users, specifiers, designers and engineers can use to evaluate the products they want to use on projects.

TRAINING VALIDATION PROGRAM
The Training Validation Program was established to set the standard for training programs offered in our industry. SWR Institute developed the following set of criteria that a training program must meet or exceed in order to become a SWR Institute Validated Training Program:

- 1 hour overview
- 1 hour safety
- 1 hour material science
- 1 hour visual demonstration
- 1 hour plan and specification review
- 2 hours hands on installation
- ½ hour quality control
- ½ hour testing and evaluation

Companies with training programs validated by SWR Institute demonstrate their company’s commitment to quality craftsmanship and end user education.

AWARDS
SWR Institute’s Award Program offers members an excellent opportunity to gain recognition for their company and notable projects. The deadline for submittals is November 30.

Trinity Award
This prestigious award speaks to the essence of SWR Institute because it not only focuses on quality craftsmanship, but also on the connections that industry professionals gain through the Institute. For a project to qualify for this award, the contractor, associate and manufacturer on the project must be SWR Institute members. The project must meet a minimum score from the judges of 75 out of 100.

Award of Excellence
The Award of Excellence offers contractors the chance to showcase their distinguished projects. Only one Award of Excellence will be given each year. The project must meet a minimum score of 85 out of 100. If more than one project reaches the 85-minimum score, the highest scoring project will be deemed the winner.

SWRI FOUNDATION
The Sealant, Waterproofing & Restoration Foundation (SWR Foundation) was established in 1999 for the purpose of providing both educational scholarships to assist and encourage students in pursuing careers in our industry and also to provide support for research, technical information dissemination and training activities.

Since 2003, the Foundation has awarded $70,000+ in scholarships to individuals seeking construction related degrees.

APPLICATOR TECHNICAL JOURNAL
Members receive a complementary subscription to our quarterly technical journal, Applicator, which is made available both digitally and in print. Applicator provides both technical and practical advice on a wide variety of industry and project related topics. Applicator is the source for industry news and serves as the voice of the Sealant, Waterproofing and Restoration Institute.

Cost effective advertising in Applicator is made available only to SWR Institute members. When you advertise in Applicator, you support SWR Institute’s mission of education while positioning your product to benefit from well-respected editorial.

MEMBER ONLY DISCUSSION FORUM
The SWR Institute Member Forum offers the opportunity to tap into the extensive knowledge of the entire SWR Institute membership, which can come in very handy when you are facing a new challenge or want input on how to solve a problem. Please note that you can adjust your email notification settings once you log in and select “Member Forum” by using the button located on our website’s home page.

MEETINGS AND FELLOWSHIP
SWR Institute’s two annual technical meetings offer both valuable educational content and engaging networking opportunities. We have a very strong Program Planning Committee that works diligently to deliver content that is informative and well designed to meet the high standards of our attendees. Offering highly useful content is only half of the equation. The other half is the fellowship that our attendees enjoy at a SWR Institute meeting. Our members are fun, highly skilled and willing to share their experiences and expertise for the benefit of the entire industry. Attend our meetings to tap into this wealth of knowledge and to share your insights with others.
