

**A VIRTUAL SMASH-UP COURSE:**  
**CERTIFIED CONTINUING EDUCATION**  
***with* IBE LEVEL III HANDS-ON TRAINING**

Polyguard Products, Inc. has created courses that provides you with Certified Continuing Education along with a specialized IBE Hands-On Training. Polyguard is proud to be a certified AIA and IIBEC Continuing Education Provider. We have several courses available to keep your firm up to date on the most current information regarding products and best practices in the commercial construction industry. We invite you to join us for the following course as detailed below.

**DATE & TIME:**

**LOCATION:**

*Course certificates will be provided for all attendees.  
AIA credits will be submitted by Polyguard Products, Inc.  
IIBEC credits are self-reporting.*

**CONTINUING EDUCATION COURSE TITLE:**

**The Integrated Building Envelope™:**

***Design, Material, Installation - Sheet-Applied Air Barriers:  
The History and Evolution of Modern Sheet Air Barriers***

**COURSE NUMBER:** PGIBEABDMI102

**AIA CREDIT:** This course qualifies for 1.0 HSW/LU credit

**IIBEC CREDIT:** This course qualifies for 1.0 CEH credit

**COURSE DESCRIPTION:**

This course provides an overview of the Integrated Building Envelope achieved through the understanding of Design, Material, and Installation in order to create Continuity in both the process and the building. This course is designed to delve into the history and evolution of sheet-applied air barriers; from the dominant air barrier membrane, to the forgotten option, and now the reemerging high-performance system today. We will discuss new technologies in both sheet and fluid air barrier components that allow them to work seamlessly together as a system.

*Polyguard is proud to be a member of these industry organizations:*

## LEARNING OBJECTIVES:

- Understand the origins of sheet-applied air barriers.
- Identify causes for how sheet-applied air barriers fell out of favor.
- How technology has brought about an evolutionary change of sheet-applied air barriers.
- Understand how to make sheet-applied air barriers part of an Integrated Building Envelope.

## VIRTUAL IBE LEVEL III TRAINING COURSE TITLE:

### *Sheet-Applied Air Barrier Hands-On Training*

## COURSE DESCRIPTION:

Experience the feeling of working with the materials used and evaluated in the “Sheet Air Barrier Mock-Up” while never leaving the comfort of your office or home. Each individual or group participating in the training will receive a Virtual IBE Level III Training Sheet-Applied Air Barrier Kit where the shipping box becomes the training mock-up and contains:

- **#1** Airlok® 400 Thru-Wall Flashing
- **#2** Airlok® UV Ultra 400 Head & Sill Flashing (2 - 17” long pieces)
- **#3** Airlok® UV Ultra 400 Jamb Flashing (2 - 13” long pieces)
- **#4** Airlok® UV 400 Field Membrane
- **#5** Airlok® UV 200 Field Membrane
- **#6** Airlok® 400 Pipe Flashing Collar
- **#7** Airlok® 400 Pipe Flashing Upper & Lower Cover
- **Box Pieces:**
  - Cardboard insert
  - Pipe penetration tube
- **Instructions:**
  - Shipping Box Turned Into Mockup

As a single source manufacturer, Polyguard offers the latest innovations in building envelope components to control moisture and air within buildings. Our Integrated Building Envelope System™ includes products designed to work together with unique connection points to protect the structure from below grade to the roof.

For questions, samples, literature and any further information, please feel free to consult with our Polyguard Professional instructor upon conclusion of the course. You may also visit our website, <https://polyguardproducts.com/architectural/> for access to all of our product information and resources.
